

Customisable Microsoft Training Content for Oracle's User Productivity Kit (UPK)

TECHNICAL SPECIFICATION

Key Features and Benefits

Larmer Brown's comprehensive library of pre-built Microsoft training material can be edited in UPK or UPK Professional.

License Requirements

Users and Developers will require the appropriate License to edit this content.

The content requires UPK Version 3.1 or above.

Importing the Content into UPK

The content is shipped as source files which can be easily imported into your existing UPK Server Client or single user environment without any significant configuration change.

The importation process comprises three easy steps:

1. Insert the media CD supplied by Larmer Brown.
2. Using the built-in import feature within UPK, locate and import the source files (known as ODARC).
3. Edit and publish as usual from within the UPK Developer Library.
