

Customisable Microsoft® Training Content with Custom Content Builder

DATASHEET

Larmer Brown's Custom Content Builder provides a cost effective, customisable solution to your Microsoft training requirements

Custom Content Builder offers a comprehensive library of Training and 'on-the-job' or 'just-in-time' support, providing an efficient way to up-skill your Users on the new features of Microsoft Office, Windows or Vista. Existing Content Titles include Office 2003, Office 2007, Office 2010, Windows and Vista. Additional titles are planned for release in 2014.

Custom Content Builder can assist your organisation realise speed to competency, reduce training costs and broaden user acceptance; avoiding the usual drop in performance when new applications are released.

With Custom Content Builder, your Users can enjoy the social benefits of classroom training and then recover the Content or learn further features and functions using Custom Content Builder's web-based simulations, thus offering self-paced, on-demand training.

The Custom Content Builder Editor enables you to personalise the library of over 2000 tasks or develop additional lessons to suit your specific requirements.

The Custom Content Builder Publisher enables you to publish your Content as a web-based simulation, classroom materials and quick reference cards, or import directly into your Learning Management System.

In addition, the Content includes a selection of questions and assessments, enabling you to test Users on their understanding and competency. Results can also be presented as customisable hierarchical reports.

Portfolio of Titles

Our comprehensive library of Microsoft Office 2003, Office 2007 and Office 2010 training materials, includes:

- Word
- Excel
- PowerPoint
- Outlook
- Access

Plus Windows and Vista. Content outlines and sample training materials can be viewed on-line at:

www.larmerbrown.com/Custom_Content_Builder.html

License Options

Users will require an End User License to access the Content using Custom Content Builder's web-based browser. A Developer License is also required in order to edit the Content using Custom Content Builder Editor.

Purchase Options

Custom Content Builder can be purchased via several flexible arrangements:

- Outright purchase via Perpetual License, plus optional Maintenance and Support.
- Annual Lease Agreements including Maintenance and Support.
- Managed Service hosted by Larmer Brown for either of the options above.

Key Benefits of Custom Content Builder:

- **Saves Time** – Office 2010 alone, (encompassing Outlook, Word, Excel, PowerPoint and Access) comprises over 2000 tasks which equates to more than 1000 man days of development. All of this development work has been done for you!
- **Multiple Outputs** – offering a fully blended learning solution including eLearning via the web-based simulation, classroom material and quick reference cards.
- **Customisation** – Content can be easily customised to reflect your corporate branding, templates and other organisational requirements.
- **Bespoke Courses** – Content can be combined from each of the Course Titles to build a bespoke Course or to reflect the learning requirements of different job roles.
- **Fully Searchable** – Content is fully searchable by key word and jump in points.
- **Questions and Assessments** – questions and assessments are included within each topic module to allow you to test Users on their understanding and competency.
- **Tracking and Reporting** – All user activity and achievement can be tracked and reported using Custom Content Builder.

Alternatively, as all Content conforms to AICC and SCORM standards it can be imported into your LCMS or LMS to utilise its tracking and reporting features.
